

Please note to use these licenses only for educational and testing use.
For generating permanent licenses please follow these steps:

1. SERVER Start > Control Panel > Add or Remove Programs > Add or Remove Windows Components'. Add "Terminal Server" & Terminal Server Licensing"
Default licensing mode is per device as we will need to for activation
2. SERVER Start Terminal Server Licensing (Start > Control Panel > Administrative Tools > Services > Terminal Server Licensing) if it is not started
3. SERVER Go to the Terminal Server Licensing, Right-click on Terminal Server > Properties > Installation Method:
Select Installation Method "Web Browser"
4. SERVER Go to next tab "Required Information". Fill all 4 fields with some none important information. Write somewhere TS ID on the bottom of that window
5. SERVER Right-click on Terminal Server and select Activate Server. Terminal Server License Server Activation Wizard will start. Read > press next
6. SERVER Select activation method "Web Browser" press next
7. WEB BROWSER Go to <https://activate.microsoft.com/> to get license server ID
8. WEB BROWSER Select "Activate a license server" press next
9. WEB BROWSER Fill out required fields with some information that makes sense. Choose country USA. Use Product ID use from step 6, press next on the bottom
10. WEB BROWSER Press next one more time on the bottom
11. WEB BROWSER If you did every thing right then you gonna get license server ID key (enter this information in your terminal server activation window), but do not close window we will need this for client access licenses (CALs). If everything is OK you will now have Terminal Server License Server Activated.
12. WEB BROWSER Next in the "Do you wish to install license tokens at this time?" select "Yes"
13. WEB BROWSER Fill out the required fields on the Microsoft web page . License Server ID get from Terminal Server CAL Installation Wizard. Important is to set License Program to "Other agreement".
14. WEB BROWSER Choose Product Type Windows 2003 Terminal server Per Device CAL, Fill quantity (I put around 100) and Agreement Number 6#5#6#5#7#9#2 (remove #'s)
15. WEB BROWSER Press next once more on the bottom
16. WEB BROWSER you are gonna get your license key pack ID what you need to insert to Terminal Server CAL Installation Wizard > close window do not press finish, but first write down license key pack ID
17. SERVER Insert license key pack ID into your server and finish wizard
